Smart Contract Audit
WEB3DFI

Deliverable
Smart Contract Audit Report
Security Report **March 2023**

Disclaimer

The information and views set out in this publication are those of the author(s) and do not necessarily reflect the official opinion of the Company. The content, conclusions, and recommendations in this publication are elaborated in the specific for only the project.

KREDICT does not guarantee the accuracy of the data included in this study. All representations, warranties, undertakings, and guarantees relating to the report are excluded, particularly concerning – but not limited to – the qualities of the assessed projects and products. Neither the Company nor any personating on the Company's behalf may be held responsible for the use that may be made of the information contained herein.

KREDICT retains the right to display audit reports and other content elements as examples of their work in their portfolio and as content features in other projects to protect all customer security purposes. The description containing confidential information can be used internally by the Customer, or it can be disclosed publicly after all vulnerabilities are fixed - upon the Customer's decision.

Overview

Background

Web3dfi requested that KREDICT perform an Extensive Smart Contract audit of their Smart Contract.

Project Dates

The following is the project schedule for this review and report:

Mar 3
→ Smart Contract Review Completed (Completed)

Mar 3
→ Delivery of Smart Contract Audit Report (Completed)

Review Team

The following KREDICT team member participated in this review:
→ **Abhishek Mishra**, Security Researcher and Engineer

Coverage

Target Specification and Revision

For this audit, we performed research, investigation, and review of the smart contract of **Web3dfi**.

The following documentation repositories were considered in-scope for the review:
→ **Web3dfi Token**

Explorer Link

0xB60a7EF7ae17d4a7398Bf19459AE88D195c12c55

Token Name	Web3dfi
Symbol	W3
Chain	Binance Smart Chain
Contract Address	0xB60a7EF7ae17d4a7398Bf19459AE88D195c12c55
Supply	1,500,000,000
Decimal	18
Burn	0.00%
Creator address	0x130b2489eb356c25e3b62a7560c97d6f3af20f84
Proxy	No Proxy
Code Visible	Yes
Can Set Fees	Safe
Can take Back Ownership	Safe
Is Mintable	Safe
Can Pause Transfers	Safe
Can Blacklist	Safe
Can Burn	Yes

About KREDICT

We believe that people have a fundamental need to security and that the use of secure solutions enables every person to more freely use the Internet and every other connected technology. We aim to provide security consulting services to help others make their solutions more resistant to unauthorized access to data & inadvertent manipulation of the system. We support teams from the design phase through the production to launch and surely after.

The KREDICT team has skills for reviewing code in C, C++, Python, Haskell, Rust, Node.js, Solidity, Go, and JavaScript for common security vulnerabilities & specific attack vectors. The team has reviewed implementations of cryptographic protocols and distributed system architecture, including in cryptocurrency, blockchains, payments, and smart contracts. Additionally, the team can utilize various tools for scanning code & networks and building custom tools as necessary.

Although we are a small team, we surely believe that we can have a momentous impact on the world by being translucent and open about the work we do.

For more information about our security consulting, please mail us at **support@kredict.com**
